3. Action Plan

Phased Roadmap

4. Data Sources & Methodology

1. Executive Summary

This report presents a comprehensive SEO audit of **bentvpro.gr** for a **IPTV subscription service (Greece & Cyprus)** site, generated on October 16, 2026. Findings combine technical, content, schema, performance, visual, and search-readiness evidence as available.

85/100

SEO HEALTH SCORE

Critical Issues Found:

1. Legal-page canonicals pointed to the homepage (fixed)
2. No security headers (fixed)
3. Site not yet deployed or indexed; no Search Console/analytics
4. Placeholder testimonials; no AggregateRating schema
5. X-Powered-By exposed (fixed); homepage meta description >160 chars

Quick Wins:

1. Self-referential canonicals on legal pages (done)
2. Security headers via next.config.ts (done)
3. Trim homepage meta description to <=160 chars
4. Verify GSC/Bing and submit sitemap on deploy
5. Collect real reviews to add AggregateRating schema

2. Audit Categories

2.1 Technical SEO

Score: 78/100

What Works

- robots.txt allows all + explicit AI crawlers, host + sitemap directives
- Valid sitemap.xml (17 URLs) with priority/changefreq/lastmod
- lang=el + hreflang (el, el-GR, el-CY, x-default)
- SSR HTML, one H1 per page, strong caching + ETag, PWA manifest

Findings

Legal-page canonicals point to homepage High

/cookies, /dmca, /politiki-epistrofon, /apopoiisi-efthinon, /oroi-chrisis, /politiki-aporritou inherited the root layout canonical (https://bentvpro.gr) instead of self-referential URLs.

Recommendation: Add alternates.canonical to each legal page. Fixed during audit.

Missing security headers High

No HSTS, X-Content-Type-Options, Referrer-Policy, Permissions-Policy, or frame-ancestors/CSP.

Recommendation: Add headers() in next.config.ts. Fixed during audit.

X-Powered-By exposed Low

Response advertises Next.js.

Recommendation: Set poweredByHeader:false. Fixed during audit.

Host canonicalization on deploy Info

www vs apex and HTTPS not yet enforced (domain not live).

Recommendation: Configure single host + HTTPS redirect in Vercel.

2.2 Content Quality

Score: 80/100

What Works

- Unique keyword-aligned titles/descriptions on every page
- Substantive copy (~5.5k words home; 4 blog articles ~1.1k words each)
- Strong Greek entity relevance and FAQ coverage

Findings

> **E-E-A-T gaps Medium**
>
> No named author/bio, no About page, testimonials are placeholder.
>
> **Recommendation:** Add About page, real reviews, visible response-time proof.

> **/kanalia overlaps home benefits Low**
>
> Channels page renders the Benefits section.
>
> **Recommendation:** Build a distinct itemized channel/category page.

> **Homepage meta description >160 chars Low**
>
> ~175 chars; truncates in SERP.
>
> **Recommendation:** Trim to <=160.

2.3 On-Page SEO

Score: 90/100

What Works

- One H1/page + logical H2s
- Rich internal linking + breadcrumbs
- Clean Greek slugs
- Correct canonicals on content pages

Findings

> **Visible breadcrumbs** Low
>
> Breadcrumbs are JSON-LD; blog has partial visible trail.
>
> **Recommendation:** Add visible breadcrumb UI sitewide.

2.4 Schema / Structured Data

Score: 90/100

What Works

- Organization+ContactPoint+sameAs, WebSite, Service+Offers, FAQPage on home
- Product+Offer+Breadcrumb on /times
- Blog+BlogPosting+Breadcrumb on blog

Findings

> **No AggregateRating/Review** Medium
>
> Withheld because reviews are placeholder (fabricated review snippets violate Google policy).
>
> **Recommendation:** Add once real reviews exist.

> **Tighter entity graph** Low
>
> Offers lack priceValidUntil / @id links.
>
> **Recommendation:** Add priceValidUntil and @id references.

2.5 Performance (CWV)

Score: 85/100

What Works

- Static prerender + aggressive caching
- next/image responsive WebP/AVIF, 2 hero images
- Self-hosted font via next/font
- Animations gated by prefers-reduced-motion

Findings

> **Field/lab CWV not measured** Info
>
> Tooling blocks localhost; domain not live.
>
> **Recommendation:** Run PageSpeed/CrUX after deploy.

> **LCP image priority** Low
>
> Verify hero is LCP.
>
> **Recommendation:** Add priority to the above-the-fold hero image.

2.6 AI Search Readiness

Score: 92/100

What Works

- llms.txt with key facts/pricing/contact
- AI crawlers explicitly allowed incl. Google-Extended
- FAQPage + self-contained factual passages
- Clear entity + ContactPoint + sameAs

Findings

> **Expand Q-shaped content + Speakable** Low
>
> More question-shaped H2s and Speakable improve AI extractability.
>
> **Recommendation:** Add Speakable and grow the blog; build off-site brand mentions.

2.7 Images

Score: 90/100

What Works

- All <img> have correct alt (1 descriptive, 1 decorative)
- next/image responsive + modern formats
- Dimensions set (no CLS)

Findings

Generic OG image / icon Low

Auto-generated TV tile, not a brand logo.

Recommendation: Add branded OG image + real logo.

---

3. Action Plan

Phase 1: Before launch Week 1

- Legal canonicals (done)
- Security headers (done)
- Disable X-Powered-By (done)
- Trim home meta description
- Deploy to Vercel + attach domain + HTTPS/single host

Phase 2: At/after deploy Weeks 2-3

- Verify GSC + Bing, submit sitemap
- Add analytics via cookie-consent
- Re-run PageSpeed/CrUX live, hero priority
- Add About page

Phase 3: Content & authority Month 2

- Real reviews + AggregateRating schema
- Itemized channels page
- More question-shaped blog posts
- Off-page brand mentions
- Branded OG/logo

Phase 4: Monitoring Ongoing

- Track GR/CY IPTV keywords
- Watch field CWV in GSC
- Monitor AI-engine citations
- Quarterly re-audit against live domain

Data Sources & Methodology

Source	Description	Update Frequency
PageSpeed Insights API	Lighthouse lab audit (mobile emulation, Moto G Power, slow 4G)	Real-time
Chrome UX Report (CrUX)	28-day rolling field data from real Chrome users	Daily ~04:00 UTC
CrUX History API	25-week p75 trend data per metric	Weekly
Google Search Console	Search Analytics (clicks, impressions, CTR, position)	2-3 day lag
URL Inspection API	Per-URL index status, coverage state, crawl info	Real-time (2,000/day)
